

## Wing Ding Torque Wrenches and Coding Rings

WDVP

- **Finger wrenches** eliminate damage to ports caused by overly tightened connectors.
- **Color-coded rings** provide a visual aid for re-connecting cables to correct ports.

### DESCRIPTION

Wing Ding torque wrenches and color-coded rings provide a creative solution to the indoor interface problem by ensuring proper tightening of F-connectors and matching ports with cables for correct reconnection. Wing Ding wrenches and rings are for indoor use with RG-59 and RG-6 video cables. The wrenches slip over all 7/16" F-fittings and do not require replacing the connector.

### APPLICATIONS

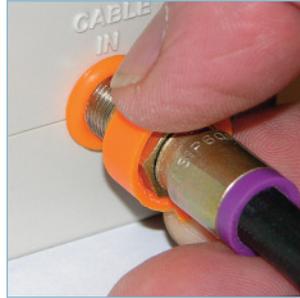

Wing Ding wrenches and rings are for indoor use with RG-59 and RG-6 video cables. The wrenches slip over all 7/16" F-fittings and do not require replacing the connector.

# Wing Ding Torque Wrenches and Coding Rings

## SPECIAL FEATURES

### Finger wrenches that fit F-connectors

Wing Ding finger wrenches slip easily over any standard 7/16" F-connector and provide torque for proper tightening of the connector to the port. This eliminates over-tightening that can damage customer equipment and loose connections that can seriously degrade signals and digital services.

### Color-coded port rings

Color matched to its corresponding finger wrench, the coding ring slips over the F-port to visually aid reconnecting the cable to its correct port. This reduces truck rolls resulting from customers who incorrectly configure the equipment when it is moved to a new location.

## ORDERING INFORMATION

Please call for quantity pricing on bulk Wing Ding orders available in a variety of colors.
